EXPERIENCE

Empire Life: Web Developer Intern
Toronto, Sept - Dec 2018

- Designed and developed client-facing chatbot to reduce manual customer support efforts using React, Redux, and Google DialogFlow
- Created a user-friendly dashboard to monitor health statistics with Figma and React Native using Apple HealthKit and Fitbit API

CIBC: Business Systems Analyst Intern
Toronto, Jan - Apr 2018

- Led a mobile device/application management (MDM/MAM) migration project, transitioning 25,000+ CIBC employees and improving internal tooling across the company
- Collected and presented data to assess project roadmaps for stakeholders
- Created digestible data visualizations and analytics reports on enterprise application usage through developing Excel scripts

Veeva Systems: QA Engineer Intern
Toronto, Apr - Aug 2017

- Validated prototypes and A/B tests of new profile page design via user testing
- Led side-branch investigations during continuous integrations in an agile environment

QuickTapSurvey: QA Engineer Intern
Toronto, Apr - Aug 2016

- Ensured quality of application in agile environment by feature, stress, load, and black-box testing; used a variety of tools to guarantee user experience was flawless via emulators, version control and continuous integration
